

# MULTICONTENEDOR

EXTENSION MECHANICAL

Polyvalent, up to 9 different  
container loading combinations

**LeciTrailer**

# MULTICONTENEDOR MECHANICAL EXTENSION

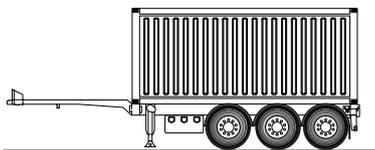

- The Multicontenedor LeciTrailer skeleton allows you to transport the whole ISO containers possibilities as well as 13.600 swap body.
- From tractor unit, you extend the frontal part. In order to move the rear section, simply, an easy mechanism is operated by handle.

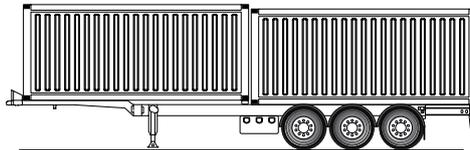

## FINISHINGS

- Grit blasted metallic structure.
- Metallic structure of the chassis shot blasted with SA 2<sup>1/2</sup> quality.
- Protection treatment against rust of the chassis by complete immersion and electro-deposition cathode (KTL) with nano-technological conversion. This challenging last generation process **guarantees a uniform layer on the entire surface of the 50 micron KTL printing chassis.**
- Finishing with acrylic-polyurethane enamel (two-component painting) in RAL colour to be agreed and dry in temperature controlled oven.
- White plywood panels.

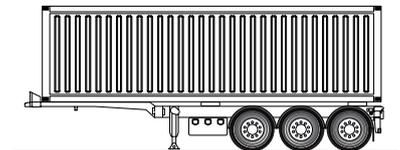

## Transport options

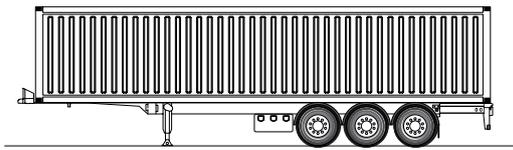

20' container at rear.

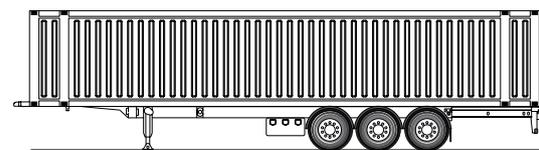

Two off 20' containers.

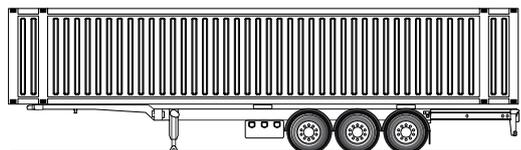

30' container at rear.

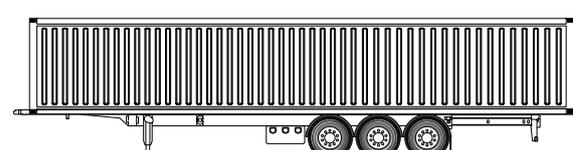

40' container straight or tunnel (HC).

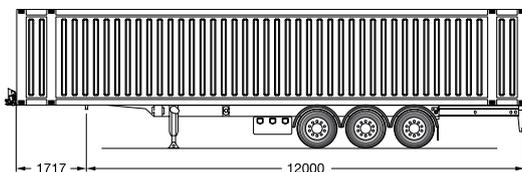

45' container.

Contentor 45' sobressai à frente, sobre o pescoço.

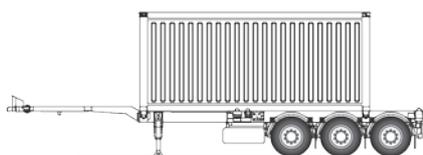

13.600 mm. swap body.

45' container.

Option: Extension Front front load container 45' and swap within the legal maximum allowed (without special permit to transport). Neck height of 150 mm. Sliding extension guided by bearings and Teflon plates. Galvanized complete set extension to ensure their conservation.

20' container central.

Opção: Twistlock adicional, rebatível, que permite a carga de um contentor de 20' avançado, aumentando a distribuição de pesos no eixo motriz do tractor.
